Inter House Parachute Making and Deploying Competition

An Inter-House Parachute Competition was organized for the students of class VIII on July 27, 2017 where total 12 students participated. Each student from a house beautifully constructed their parachutes using waste materials. They used their innovative ideas to create the parachutes with an objective to do safe deployment of parachute containing a piece of **chalk, egg and glass containing water**. To fulfill their objective students used different types of material like bubble wrap, cotton, thermocol, empty bottle etc, further they deployed their parachutes and were judged on different parameters like construction, time of deployment, Stability etc. Students enthusiastically participated, enjoyed and learnt various new aspects of science. The winning team was declared by Ms. Anjali after the judgment, **Gurunanak House received the 1st position and Kabir House received 2nd position.**
