

ASTRONOMY CORNER AT PARENT TEACHER MEETING

Details of the Event:

To inculcate different aspects of space science and give students hands on learning experience, an Astronomy corner was setup in the school on August 19, 2017 where activities such as Stomp Rocketry, Know your planets, Eclipses, Astro-tattoo, Constellation, Satellite Assembling, Shadow Matching etc were performed by students as well as their parents. Parents also got to know about the **upcoming Total Solar Eclipse** with the help of **working model** and information displayed on the board. Student volunteers of classes VI to XI assisted the parents in understanding the concept and deserve an honorable mention. The event helped to enhance their scientific temperament and interpersonal skills. The participants enjoyed the activities and gave a positive feedback.

PHOTOGRAPHS OF THE EVENT:

Students were dressed up as planets and shared interesting facts of planets with the parents

Students shared the facts of planets with the people

Students enjoyed launching stomp rocketry

Students enjoyed making Comet

Ritwik of class VI explained about eclipses using a working model of Sun Moon and Earth

Parents got themselves an Astro-tattoo

Students learnt about constellations using constellation viewer
