

ASTRONOMY FIESTA

To inculcate different aspects of space science and give students hands on learning experience, Astronomy activities were setup in the school on December 9, 2017 where activities such as Stomp Rocketry, Find the Direction, Moon-Surface, Astro-tattoo, Discovering the Skies, Weigh yourself on different Planets, Pop Rocketry, Ring the Planets were performed by students as well as their parents. Students of class VII presented a play on Greek mythological story: Orion- the Hunter. A board was decorated sharing the information about the upcoming event **Project Paridhi**. Student volunteers of classes VI to VIII assisted the parents in understanding the concept and deserve an honorable mention. The event helped to enhance their scientific temperament and interpersonal skills. The participants enjoyed the activities and gave a positive feedback.

PHOTOGRAPHS OF THE EVENT:

Students dressed up like an Astronaut and walked on the moon surface

Students made their POP rockets

Student dressed up like an Astronaut and launched Stomp Rockets

Students of class VII presented a play on Orion constellation

Students got themselves an Astronomy tattoo

Student volunteers conducted Ring the Planets activity

Students and parents checked their weight on different planets weighing machine

Student and parent learnt to find directions using magnetic compass

Students arranged objects according to their place in the sky

Parents observed Sun through telescope
