

GLOBAL STAR PARTY

May 5, 2017

Moon and Planet watch was organized for the parents and students of grade VI. More than 250 people turned up to see our natural satellite-Moon and planet Jupiter with its visible moons through a 200mm Dobsonian Telescope. The whole evening was dedicated to the most ancient and fascinating branch of Science i.e. Astronomy. The sighting of the moon and Jupiter was clubbed with lot of activities like catch the Meteor, Hydro Rocketry, Shoot the Alien, Terrestrial Observation, Pop Rocketry, Tattoo Making, Light Blocker etc. People of all age groups, from students to parents and even the grandparents wholeheartedly participated in the event. This was an interactive, informative and fun zone organized in the school for the budding astronomers.

This evening turned out to be an enjoyable and happening one, everyone cherished the images of Jupiter and our natural satellite- Moon.

Tejas and Tejasi of class IX welcomed the parents and students

Students enjoyed playing Shoot the Alien

Parents observed Moon and its features through a Telescope

Students posed like an Alien

Students got Astronomy tattoo on their hands

Students enjoyed playing "Catch The Meteors"
