

Technology Club

School started technology club (Level I and II) for the tech enthusiast, wherein they will learn App development, coding and Robotics using Lego. Level II students will also work on some real time project in the school. During ongoing sessions of the club, these topics were covered:

Students of Level I learned basics of gears, pulleys and levers. They developed a spinning top and power car using these parts. Basics of EV3 kit and sensors were also introduced.

Level II students were introduced to Aurdino. They started with basic Aurdino programming and developed projects like a mood lamp using RGB, Object avoidance Bot and Line follower Bot.
