

NAME _____ CLASS III _____ DATE - 09.04.2020

Introduction:

Many animals have tails. These animals use their tails differently. Let's learn about these animals.

Kangaroos have a thick tail; they use their tail to maintain its balance.

Squirrels have long, bushy tail, they use their tail to balance their body while leaping and climbing.

Cows and **buffaloes** use their tail to swat insects.

A **monkey** uses its tail to swing on the branches of trees.

Most water animals like **fish** use their fins to swim and tails to change direction while moving in water .

GLOSSARY

To be done in the notebook. Find out the meanings of the following words that have been used in the text:-

- a) Maintain b) Balance c) Leap
