Discover India

There are some unique things that are found only in India.

Bridges made entirely with roots are found in Meghalaya. It is the wettest state in India and has the wettest place in the world. The bridges here are made entirely of roots to prevent them from rotting due to moisture.

Magnetic Hills are found in Ladakh. They are well known as objects and cars may appear to roll uphill in defiance of gravity, when they are in fact going down on a downhill road.

Padmanabhaswamy Temple in Thiruvananthapuram, Kerala, is the richest Hindu temple in the world. The Archaeology Department of India opened secret chambers in the temple in 2011 and discovered gold, silver and precious stones adorning many jewellery and articles.

The tallest statue in the world is found in India. It is the 182 m high **Statue of Unity**, a statue of Sardar Patel in Gujarat.
