- Google Pixel, Google Glass and Google Home are the three Google Devices. Google Pixel is an Android smartphone designed by Google. It has a built in Google Assistant.

- Google Glass is a wearable, voice-controlled Android device. The user can view information, take videos and photos. It works through Voice commands or by touching controls on its frame.

- Google Home is a voice activated smart speakers developed by Google. It can play music, news, perform home automation tasks and answers complicated questions. Google Home includes **home automation features**, enabling owners to use it as a central hub to control smart devices.

ACTIVITY 1

1. Create two folders in your Google Drive to store your files
 - Lessons
 - Homework

Also upload any two files in these folders.

2. Find about more Google Apps and create a presentation on any five Google Apps that you use most frequently. Use Google Docs (Slides) to create 5-6 slides
