

SPECIAL DAYS RELATED ACTIVITIES DESIGNED FOR STUDENTS

- Co-curricular activities have always been a part of the school curriculum. These activities not only **break the boredom of routine life** but also help in the **holistic development of students**. With this view in mind, several activities were designed and shared with the students on special days of the month such as Armed Forces Day, and National Technology Day. The participation in these **non-competitive activities** helped the learners develop collaborative skills, problem solving and, most importantly, sustain emotional balance.

- In order to express gratitude towards their teachers and school, the students of the Middle and the Secondary Department created beautiful **Thank You videos**. They acknowledged the efforts put in by the school authorities to provide quality education even during these unprecedented times.
