LEARNING OUTCOMES

By the end of this lesson **each learner will be able to:**

- Understand the concept of movie Creating and Editing using Windows Movie Maker.

INTRODUCTION ACTIVITY :-

- Windows Movie Maker is a video editing software that allows us to create and edit videos. This program is manufactured by Microsoft.
- Windows Movie Maker is also known as Windows Live Movie Maker or Movie Maker.
- It allows us to build movies from photos, videos and animations, providing built in sounds and effects.

Components of Windows Movie Maker

- Title bar
- File tab
- Quick access toolbar
- **Storyboard** - It is used to look at the sequence or ordering of clips in your project and easily rearrange them.
- **Preview Monitor**- It enables you to view individual clips of an entire project.
- **Full screen preview** - It is used to make the preview monitor larger or smaller.
- **Zoom Slider** - It is used to change the size of content or customize the look of the storyboard.

Adding photos / Videos

- Click on Home Tab
- Click on Add Videos and Photos.
- A dialog box appears, select the folder from which you want to add the photos select the pictures that you require.
- Click on Open.

Adding music

- Click on Home Tab
- Select the Add Music option, a dialog box appears, navigate the folder from which you want to add music files
- Select the music file that you require
- Click on Open
- The selected music file will be added and a Green Wave bar is added at the base of clips in storyboard of a Movie Maker
- Click on play button to preview the movie along with the music in preview monitor

Practical Activity :

Create a short Movie on a topic E- Waste. The movie must contain 4-5 pictures and a small video clip relevant to the topic.

Assignment

1. What do you mean by Windows Movie Maker?
2. Define the following terms -
 - Storyboard
 - Preview Monitor
3. Name any three softwares that can be used for editing videos.
