

BAL BHARATI PUBLIC SCHOOL, PITAMPURA, DELHI – 110034

CLASS IV SUBJECT- SCIENCE (2020 - 2021)

TOPIC- TEETH AND MICROBES

NAME - _____ CLASS IV/ SEC _____ DATE – 23/11/2020-27/11/2020

LEARNING OBJECTIVES: -

Each child will be able to –

- write at least three functions of teeth.
- define milk teeth.
- differentiate between temporary teeth and permanent teeth.

A beautiful smile comes from healthy teeth. They are one of the most important features of our face.

Apart from adding aesthetic value, they perform many other functions.

We bite and chew food with the help of teeth which makes digestion easy.

Teeth give proper shape to our face.

ACTIVITY- TOOTH TALK

Tell something about your family in about 4-5 sentences.

Now repeat the same sentences but without letting your tongue touch your teeth.

Teeth are important because _____

A TIMELINE OF THE TEETH IN A BABY!!

New born baby has _____ teeth?

The first tooth appears when a baby is about _____ old.

A new born baby cannot eat food because _____.

VIDEO TIME:

<https://www.youtube.com/watch?v=JObsBVhpYk0>

Between the ages of 6-10 years, the milk teeth/temporary teeth start to fall one by one. In place of them, new teeth grow which are called 'PERMANENT TEETH'.

WISDOM TEETH

Most people have four teeth (called wisdom teeth) grow in at the back of the mouth when they're between 17 and 25 years old. These complete the adult set of 32 teeth.

Why are these teeth called WISDOM TEETH???

But, from where does this new set of teeth come into our mouth? Let's explore....
