

**BAL BHARATI PUBLIC SCHOOL, PITAMPURA, DELHI – 110034**

**CLASS IV SUBJECT- SCIENCE (2020 - 2021)**

**TOPIC- TEETH AND MICROBES**

**NAME - \_\_\_\_\_ CLASS IV/ SEC \_\_\_\_\_ DATE – 01/12/2020-04/12/2020**

**LEARNING OBJECTIVES: -**

Each child will be able to –

- identify each kind of tooth and its number in each jaw.
- write down at least one function of each tooth correctly.
- differentiate between different kinds of teeth.

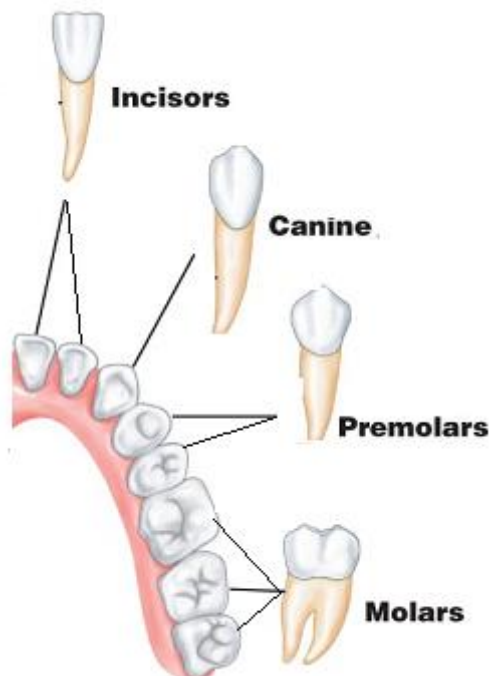

As you know humans have two sets of teeth in their lifetime.

**ACTIVITY- FACE TIME WITH MIRROR:**

Now, observe your teeth in the mirror.

Are they all alike? \_\_\_\_\_

There are four kinds of teeth in a permanent set.

Which of these types of teeth are present in your mouth?

Now observe the teeth of your parents/grandparents/sibling and see if all these types of teeth were present or not.

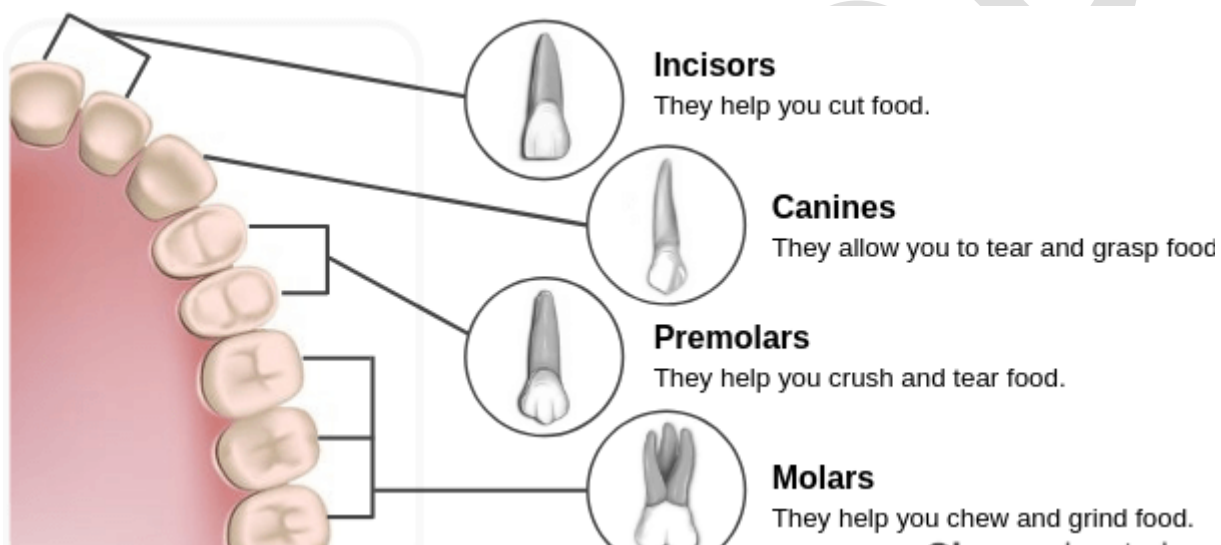

Now you know that we have four kinds of teeth. Let's find out the function of each kind of tooth.

Eat different food items like apple, chapati, almonds, sugarcane, meat, etc.

Now answer:

- When you bite an apple, which teeth do you use ?
- When you eat non vegetarian food, which teeth are used to tear the meat?
- Which teeth are used to chew chapati?

## Types of teeth and their functions.

## LET'S REVISE

Q. Complete the table.

	INCISORS	CANINES	PRE- MOLARS	MOLARS
SHAPE				
NUMBER				
FUNCTION
