MARCH ACTIVITIES

SPORTS DAY OF PRE PRIMARY

"Obstacles cannot stop us when we believe in ourselves"

This year's sports day gave us a platform to prove it right. The teachers of Pre primary helped children practice the steps for the sports drill and motivated them for participation in virtual sports drill with full zeal and enthusiasm (with props- ball, pencils with ribbons) on 12.3.2021.

A few children also made us re-live the long cherished forgotten sports like posham pa, pithhu, hopscotch, etc.

HOLI CELEBRATION IN PRE-PRIMARY

Holi is a festival of colours that brings joy and happiness in everyone's lives. The vibrancy of colours brings in a lot of positivity and people come together as one and let go of their differences.

The children of **Pre-Primary** celebrated Holi with lots of joy and enthusiasm on **23.3.2021**. The significance of the festival was discussed by the facilitators in their virtual classes, that it signifies the triumph of good over evil. The facilitators also narrated the story behind this festival, of King Hiranyakashyap and his son Prahalad. Through the story the message of being honest and truthful and also to fight away the evil was conveyed to the children. The facilitators also shared about the do's and the don'ts to be followed on the day of Holi. Children were dressed up in white t-shirt/kurta and they also arranged the dry colours(gulal)/flower petals/water guns/Gujia to celebrate it in their virtual class. Children enjoyed playing with the same and by eating gujia and simultaneously dancing on the music. It was really a fun filled and an enjoyable day for them. They were also asked to colour the worksheet related to Holi given in their Activity Book.

New Initiative, March 2021– Flip the Switch March Activity

To make the children aware of energy conservation, in the month of March, Pre-Primary and Preschool children were enlightened about the various ways to save energy and small steps that the children can take to reduce the use of electricity consumption. During virtual class all the children were asked to take a round of their home and switch off all the extra lights, fans (if any) and electric gadgets.

This simple, fun activity created awareness amongst the children to be consciously taking care of not wasting electricity. This activity was spread over the entire month and at the end of the month the children were encouraged to share their views on, how they had contributed in saving electricity.
