Financial Literacy

Financial literacy is an important life skill that empowers students to manage finances. One of the most popular tools used to introduce financial concepts to children is through their piggy banks. Children of Class 3 were guided to make their own piggy banks. Piggy banks offer a tangible way for children to experience the act of saving money. By physically placing coins or bills into the piggy bank, children can visualise the growth of their savings over time. It encourages kids to allocate a portion of their allowance towards specific goals like buying a toy or saving for a special occasion. It also enables children to acquire quantitative aptitude as they calculate and sort money while depositing into the piggy bank.
